**Coveted quality certification to help Grauer and Weil (India) tap opportunities in aerospace sector**

Mumbai-based electroplating chemicals and metal finishing solutions provider, Grauer and Weil (India) Ltd., has announced that it has been awarded with the coveted AS9100 aerospace certification. The company said it is the first firm chemical and paints company in India to receive this accreditation globally.

AS9100 is an aerospace standard based on the ISO 9001 quality system requirements. It takes the ISO 9001 requirements and supplements them with additional quality system requirements, which are established by the aerospace industry in order to satisfy DOD, NASA and FAA quality requirements. "The certification now puts Grauer and

Weil (India) Ltd. in the elite group of companies adhering to international quality standards that offer services to marquee aerospace companies," the company said in a press note.

Commenting on the achievement Mr. Vinod Haritwal, CEO, Grauer and Weil (India) Limited said, "This has opened up new avenues and opportunities for us and we are eager to offer state-of-the-art

assistance to customers looking for a partner. With the certification, we can now approach parts manufacturers of the aerospace industry for business which is expected to grow in India in the near future."

The company offers a diverse product portfolio including chemicals for electroplating, anodising, phosphating, pre-treatment and topcoats, engineering plants, effluent treatment and waste recovery systems, industrial lubricants, high performance protective paints and coatings for the automotive, oil & gas and marine industry. The company has manufacturing plants in different parts of the country – two in Dadra Nagar Haveli, one each in Vapi, Alandi, Chembur and one each in Barotiwala and Jammu in North India.
