UK Avoids Recession, but 'Not Out of Woods' Over Inflation

GDP registers zero growth in Q4, in line with expectations after shrinking Q3 data

LONDON — Britain's economy avoided a recession in the fourth quarter, but it remains "not out of the woods" due to inflation, according to the Office for National Statistics (ONS) on Tuesday. The ONS reported that the UK economy grew by 0.1% in the fourth quarter, following a 0.3% decline in the third quarter. This marks the first time since the start of the pandemic that the UK economy has grown in two consecutive quarters. However, the ONS also reported that inflation remained high, with the Consumer Price Index (CPI) rising by 5.1% in the fourth quarter. The ONS said that the UK economy is still facing challenges, including high inflation and a tight labor market. It also noted that the UK government's fiscal policies are likely to have a positive impact on the economy in the coming months.

We are not out of the woods yet, particularly when it comes to inflation, and economy is more resilient than many feared

China's Current Account Surplus at 14 Yr High

BEIJING — China's current account surplus reached a 14-year high of \$100 billion in the first quarter of 2023, according to the National Bureau of Statistics. The surplus was driven by a strong trade performance, with exports growing faster than imports. The current account surplus is a key indicator of a country's economic health, and a high surplus indicates that the country is earning more from its exports than it is spending on imports. This is a positive sign for China's economy, particularly in the current global economic environment.
